Hawthorne Commons Café • Project HC-17 • 14 September 2026

What this is

This packet is a fictional record from one working day on a small commercial tenant-improvement project. The sources were created for the Field Signal paid exercise. They are incomplete, repetitive and occasionally contradictory by design.

Canonical sources

S-00	01_Project_Primer.pdf	Background reference • page/section
S-01	02_Site_Huddle_Transcript.pdf	Rough transcript • timestamp
S-02	03_Project_Message_Thread.pdf	Messages • message timestamp
S-03	04_Three-Week_Schedule_Excerpt.xlsx	Schedule • activity ID / row
S-04	05_HVAC_Change_Quote_CA-118.pdf	Quotation • section / line item
P-01-P-03	06_Site_Photos/*.png	Photographs • image ID + precise region/crop
P-REG	06_Site_Photos/06_Photo_Register.pdf	Photo provenance • register row

Each logical source has exactly one canonical representation. Do not treat the photo register and its image files as duplicate findings: the register supplies provenance/captions; the images supply visual evidence. 00_SOURCE_MANIFEST.json contains release hashes and locator guidance.

Important boundaries

- Construction experience is not required. Research unfamiliar terms as needed.
- Treat each artefact as a source with its own author, time and limitations.
- Nothing outside this packet is a fact about this fictional project.
- You may ask questions that could materially change your direction. Make and record reasonable assumptions where they would not.
- Do not contact real people or trigger external actions using fictional identities.

Image notice

The three site photographs are AI-generated fictional evidence created solely for this hiring exercise. Evaluate what the images support, but do not assume an image proves intent, authority, completion, exact dimensions or code compliance.
